TRAFFIC AND REVENUE DATA – JUNE 2014

Transurban has today announced its traffic and revenue data for the June quarter 2014.

For the June quarter, on a statutory basis, toll revenue increased by **13.1%** to **\$234.1 million** when compared to the prior corresponding period. Proportional toll revenue, which Transurban believes is the most accurate reflection of the portfolio's performance, increased by **11.8%** from the prior corresponding period, to **\$286.7 million**.

For the financial year ended 30 June 2014, on a statutory basis, toll revenue increased by **13.1%** to **\$906.5 million** when compared to the prior corresponding period. Proportional toll revenue increased by **12.6%** to **\$1,116.7 million**¹ compared to the prior corresponding period.

One fewer workday in the current quarter when compared with the prior corresponding quarter suppressed ADT growth by between 0.2% and 0.6% across the Australian asset portfolio.

Transurban's Sydney network continued to deliver strong traffic growth during the quarter, driven principally by traffic growth in the north-west corridor of the orbital network resulting from the M2 upgrade, which was completed in August 2013. Average traffic growth across Westlink M7, Hills M2 and Lane Cove Tunnel was 10.3% for the quarter.

Revenues for the 495 Express Lanes in the USA also grew strongly during the period, reaching a new daily high of US\$161,945 on 29 May 2014. Average daily revenue during the quarter grew 100.3% compared to the prior corresponding period. Transurban increased its ownership interest in the 495 Express Lanes to 94.0% during the period after it completed the capital restructure of the 495 Express Lanes and acquired Fluor's 10.0% stake in the project.

Operational highlights for the period included:

Queensland Motorways

- Transurban, along with its bid partners, reached financial close on the acquisition of the Queensland Motorways assets and concessions on 2 July 2014.
- Traffic and toll revenue reporting on Queensland Motorways will commence in the September quarter's results release.

Cross City Tunnel

- Transurban reached financial close on the acquisition of the Cross City Tunnel concession on 26 June 2014.
- This quarterly results release includes traffic and revenue data for the four days of Transurban ownership between 26 June and 30 June 2014.

¹ Due to the timing of processing and revenue accruals related to the bedding down of a new tolling and customer billing system, a negative adjustment of \$3.3 million is included in toll revenue for the prior corresponding year. Without this adjustment, proportional toll revenue growth would have been 12.3% on the prior corresponding period.

Appendix 3 – Reconciliation of proportional toll revenue to statutory toll revenue

Basis of preparation

This document includes toll revenue reported on a statutory as well as non-statutory basis (proportional toll revenue).

Proportional toll revenue is the aggregation of the results from each asset multiplied by Transurban's percentage ownership. The proportional result is one of the primary measures that the Board uses to assess the operating performance of Transurban, with an aim to maintain a focus on operating results and associated cash generation. It reflects the contribution from individual assets to Transurban's operating performance and permits a meaningful analysis of the underlying performance of Transurban's assets.

The table below reconciles proportional toll revenue to statutory toll revenue for the June quarter and full year FY14.

	Jun 14 quarter (\$'000)	Jun 13 quarter (\$'000)	% change
Proportional Toll Revenue	\$286,725	\$256,534	11.8%
