Risk Management Policy

Transurban is a toll road owner and operator with a vision to build stronger communities through transport. We provide confidence to all our stakeholders and communities in our operations through the consistent application of sound financial disciplines and strong governance and risk management practices.

This Policy applies to directors and employees of Transurban, our contractors and their employees. This Policy defines the Transurban approach to risk management, the key relationship of risk with our objectives, and the integration of business processes in managing risk.

Our approach to risk management will drive informed decisions that optimise returns within a specified tolerance or our stated appetite for risk.

As risk both positive and negative is inherent in all our business activities, effective risk management is crucial to us achieving our objectives and being innovative. Fully considering risk enables us to deliver greater rewards back to our security holders and broader communities and stakeholders. Understanding the risks we face and how they should be treated will always be key considerations in our decision making.

Responsibility for managing the uncertainty of risk rests with line management. Accountability for managing risks includes being responsible for ensuring the risk treatments that are in place are both adequate and effective.

Transurban will actively integrate risk management processes into our operations, business activities, functions and processes through the implementation of an organisational wide enterprise risk management framework.

Across the Group, risks will be identified and assessed in a consistent manner. Proactive treatment and contingency plans will be designed and implemented and their effectiveness will be systematically reviewed and improved where necessary.

Our risk management performance will be monitored, reviewed and reported. Our executive management and the Board will get assurance of compliance to this policy through oversight of our risk management framework and the progress made in implementing it.

Risk-related reporting to our security holders will comply with the ASX Corporate Governance Principles.

Transurban will apply our risk management framework to:

- deliver greater certainty and confidence to all our stakeholders, and strengthen the communities in which we operate;
- continually improve our safety outcomes;
- identify opportunities for innovation;
- enhance our risk management capability and maturity;
- deliver informed assessments, with no surprises;
- regularly review our exposure to all forms of risk and manage them within defined limits of our risk appetite and acceptability;
- harness and share risk knowledge across the business to promote better practices;
- maintain and build on our corporate reputation;
- help attract and retain the right people;
- improve business and financial management;
- drive our assurance program;
- enhance organisational sustainability and resilience; and
- embed risk management into the business’s decision making processes and long term strategic planning activities.

Scott Charlton
